# Welcome to

KERNEL PANIC is a 2D highly-interactive puzzle game where players can feel like a hacker (and learn a bit about how computers work, too).

Control multiple beads, called PROCESSES, in order to complete beads

Use a collection of SYSTEM CALLs explore the feel of the game, from Gorgeous terminal UI teleporting to creating new processes making you feel like a game uses a grading system, so you can beat the level and come back for more later

KERNEL PANIC! is an HTML5 game that harnesses the power of the internet for portability. It's already available on modern browsers and
